HOSPITAL ER ANALYSIS DASHBOARD

KEY TAKEAWAYS

DESCRIPTIVE ANALYSIS (April 2023-October 2024)

The emergency room datasets, covering period of 19 months, record a total of 9216 unique patients

Patient Wait Time & Satisfaction:

The average wait time was approximately 35.3 minutes, indicating a need to enhance patient flows. The average satisfaction score was 4.99 out of 10, suggesting a moderate satisfaction and highlighting areas for improving patient experience.

Department Referrals:

A significant amount of Patients (5400) does not require referrals. Among those referred, those common in General Practice (1800) and the least in Renal (86).

Busy Peak Period:

The busiest day were Saturdays (1377) followed by Thursday (1332). There isn't much difference in volume from Monday to Sunday. The busiest hour occurs between 00-02 indicating midnight to 2am followed by suggesting a strong overnight staffing and efficient triage process.

Patient Demographics:

Age groups: Adults (30-39 years) formed a large group (1200 patients), followed by young adults (20-29 years) with 1188 patients. Other significant groups included middle age as well (40-50 years)

Race Distributions:

The largest group was White (2571), followed by African American (1951), multi racial (1557), and Asian patients (1060). A significant number of patients (1030) declined to identify their race.
